

Benefits of StyleMaster

Why clothing manufacturers and wholesalers run their business on StyleMaster.

1. Ease of use.
2. Built for Windows, including Windows 10 Pro.
3. Designed for Windows, so input screens fit well on the monitor.
4. All reports are on A4. Invoices and statements are customised.
5. All reports can be exported to various formats (Excel, PDF, Word and more).
6. All reports can have images inserted (colour or black and white).
7. All information can be stored in a shared folder for everyone to access.
8. User security at three levels: user name, activity and password authority.
9. Real-time data: all files are updated instantly.
10. Integrates accounting data with Pastel or other third-party solutions.
11. Client-server database technology: no re-indexing, better-protected data, able to carry a lot of data, better data integrity and faster processing.
12. User-defined fields, in line with industry usage.
13. Familiar Windows interface. Users already know how to work with files and the mouse, and the software uses the full resources of your PCs.
14. Printer and other device sharing.
15. StyleMaster reduces paper flow.
16. Invoices, orders and statements can be emailed directly from the program.
17. As technology changes, the software is upgraded.
18. Reduces the risk to your business of a system crash or downtime.
19. Future-proofs your data and operations.
